It is certified that an error appears or errors appear in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

(54) EARTH-FRIENDLY CARDBOARD CASKETS FOR CREMATION
AND BURIAL

(76) Inventor: Chen Lew, 19140 Stevens Creek Blvd. Suite C-102,
Cupertino, CA (US) 95014

(57) **ABSTRACT**

A collapsible casket for cremation and burial is formed of cardboard and has the appearance of a typical wood or metal casket. The casket is assembled by folding along pre-scored lines to form a two-piece raised lid, those having a plurality of slots on the bottom and a set of slots in the back edge. The slots engage a plurality of tabs extending upward from the top of the back wall of the tray. Tabs within the slots on the back of the lid and the slope of the back wall of the tray provide support for the lid to stand in an upright position. When the tray is covered with the lid, the tabs engage the slots in the bottom wall of the lid, thereby securely holding the lid in place. During a ceremony, one lid section may be closed position and the second lid section lid is upright, thereby giving the appearance of a standard two-part casket lid.
